

WayOfMono

The Universal AI Coding Agent Harness

One intelligence backend, any agent frontend.

Pre-Seed | \$750K at \$5M Pre | June 2026

The Problem

53% of developers use 2+ AI coding tools — but there's no standard way to share skills, configs, or memory across them. Enterprise teams face vendor lock-in, zero observability, and duplicated effort.

The Solution

WayOfMono is a universal AI harness that installs 81 shared skills, 6 subagents, and full configurations across **7 AI coding tools** from a single source of truth. Includes CTO Dashboard for team governance.

Market

- **TAM:** \$40B (Total Agentic AI Market, 2026)
- **SAM:** \$10B (Enterprise AI Coding Agents)
- **Growth:** 26-48% CAGR to \$91B by 2035
