

WayOfMono — Go-To-Market Strategy

Target Audience

Primary: Developer Tool Buyers

- **Engineering leads** at startups and SMBs (10-200 engineers) evaluating AI coding tooling
- **CTOs and VPs of Engineering** at enterprises (200-5,000 engineers) needing AI governance
- **Individual developers** who use 2+ AI coding tools and want consistent skills/configs

Secondary: Platform Integrators

- **AI coding tool vendors** who want their tools to work in enterprise environments
- **Consulting firms** building AI-augmented development practices for clients

Go-To-Market Channels

1. Developer-Led Growth (Bottoms-Up)

- **Open-source GitHub repo:** Free community edition drives adoption
- `npm install` **discoverability:** 13 packages discoverable on npm
- **Developer documentation:** Comprehensive docs at docs.wayof.work
- **Quick-start guides:** "Install all 7 tools in 30 seconds" — low friction
- **Viral mechanic:** Devs install WoM, team sees CTO Dashboard → team adoption

2. Content Marketing

- **Technical blog posts:** Architecture deep-dives, comparison articles
- **"AI tool fragmentation" narrative:** Original research on multi-tool usage
- **Tutorial series:** YouTube / Twitch coding sessions using wo code

Pricing Strategy

Tier	Price	Target	Activation
Community	Free	Individual devs, small teams	<code>ai-harness --tool=all --yes</code>
Team	\$19/seat/mo	Growing teams (10-100 seats)	CTO Dashboard cloud
Enterprise	\$49/seat/mo	Large enterprises (100+ seats)	SSO, audit, on-prem

Consulting: \$15K-\$50K per engagement for enterprise deployment, custom integrations, training.

Competitive Positioning

Narrative: "WayOfMono is the operating system for AI-augmented software engineering. Just as Windows/OSX abstract hardware, WoM abstracts AI coding tools — you use any tool, we provide the shared infrastructure."

Key messaging pillars:

1. **Freedom of choice:** Use any AI coding tool, switch anytime
2. **Team visibility:** Know what your developers are doing with AI
3. **Batteries included:** 81 production-ready skills out of the box
4. **Your data stays yours:** Local-first, private, offline-capable

Launch Plan

Phase 1: Community Building (Months 1-6)

- Publish 10+ technical blog posts on AI tool ecosystem
- Launch Discord community
- Grow GitHub stars to 500+
- Publish comparison benchmarks vs. competitors

Phase 2: Team Product Launch (Months 3-9)

- Launch Team tier with cloud dashboard
- First 10 paid teams (free during beta)
- Case studies with early enterprise adopters
- Partner with AI coding tool vendors
