

WayOfMono — Team Bios

Core Team

Josef Lindbom — Founder & CEO

Full-stack AI engineer and system architect with deep expertise in TypeScript, LLM integration, terminal UI development, and distributed systems.

Key achievements in WayOfMono:

- Designed and built the entire platform architecture
- Created `@wayofmono/wo-ai`: Multi-provider LLM abstraction (30+ providers, 30,616 lines)
- Built `@wayofmono/wo-tui`: Custom zero-dependency TUI framework (11,160 lines)
- Created `@wayofmono/wo-agent` (wouser): General-purpose agent SDK (46,295 lines)
- Created `@wayofmono/wo-coding-agent` (wocode): Coding agent CLI (46,539 lines)

Extended Team

Tomas — Engineering

Engineering team member contributing to platform development.

Andre — Engineering

Engineering team member contributing to platform development.
