| Location           | Remote-first (Global)                          |

# Company Mission

---

To unify the AI coding tool ecosystem by building the universal intelligence layer that works with any tool, any model, and any workflow.

# Product Lines

| Product                    | Description                                                   | Status            |
|----------------------------|---------------------------------------------------------------|-------------------|
| AI Engineering Harness     | Cross-tool skill/agent/config installer for 7 AI coding tools | ✓ v1.7.6 (Active) |
| wocode (Wo Coder)          | High-performance CLI coding agent                             | ✓ v1.1.0 (Active) |
| wouser (Wo Agent)          | General-purpose AI assistant SDK + CLI                        | ✓ v1.0.4 (Active) |
| CTO Dashboard              | Team AI governance, tickets, standups, skills health          | ✓ v0.6.3 (Active) |
| f-rr-d Context Engineering | Ticket-to-commit workflow system                              | ✓ Active          |

# Published NPM Packages

---

All 13 packages under `@wayofmono` scope on npmjs.com:

- `@wayofmono/wo-ai` (Multi-Provider LLM API)
- `@wayofmono/wo-agent` (General-Purpose Agent SDK)
- `@wayofmono/wo-coding-agent` (Coding Agent CLI)
- `@wayofmono/wo-agent-core` (Agent Runtime)
- `@wayofmono/wo-tui` (Terminal UI Library)
- `@wayofmono/wo-web-ui` (Web UI Components)
- `@wayofmono/wo-skill-docs` (Documentation Expert)
- `@wayofmono/wo-mermaid` (TUI Mermaid Renderer)
- `@wayofmono/web-access` (Web Intelligence)

# External Integrations

---

| Integration | Type                                       | Status                             |
|-------------|--------------------------------------------|------------------------------------|
| Way of Pi   | AI engineering platform (Electron/Web IDE) | Active — uses @wayofmono/wo-agent  |
| Way of Work | AI-powered productivity platform           | Active — uses @wayofmono/wo-agent  |
| OptiCat     | HVAC optimization platform                 | Active — uses WoM APIs and harness |
